RONNALEE N. ORTEZA, PhD
Executive Director
Philippine Science High School System
Agham Road, Diliman, Quezon City

Dear Dr. Orteza,

I am writing to express my interest in the **Information Systems Analyst I** position at the Philippine Science High School System. With hands-on experience in higher education and educational technology, I am confident in my ability to contribute meaningfully to the organization.

Experience in Higher Education

During my two years as a **Lecturer** at **Marinduque State University**, I taught core Computer Science subjects such as **Discrete Mathematics, Cryptography, and Artificial Intelligence**. I designed and delivered comprehensive syllabi specifically tailored for Information Technology students in alignment with CHED’s graduate outcomes, focusing on **hands-on projects and the application of industry-relevant tools**.

I also created learning materials tailored to students with diverse needs, making complex concepts easier to understand. With this experience, I believe I can effectively **contribute to developing digital learning content and systems aligned with the PSHS curriculum**.

Learning Management Systems

Throughout teaching, I **managed Learning Management Systems (LMS)** to enhance student engagement and instructional delivery. I used **Google Classroom** to handle classes with over 150 students, creating course modules, organizing content, monitoring engagement, and recording performance. I also used **Canvas** as an alternative LMS for one of my courses due to its advanced features such as timed assessments and built-in analytics. Additionally, during my undergraduate years, I gained experience with a customized LMS called the **University Virtual Learning Environment (UVLê)**.

Proficiency in Educational and Productivity Tools

Beyond LMS, I regularly integrate productivity and multimedia tools to support instruction and administration. For productivity and documentation, I utilize **Microsoft Word, Excel, PowerPoint, Google Docs, and Google Forms**. For visual content and presentation materials, I design using **Canva and Photoshop**, while **Sony Vegas** is my preferred tool for video editing.

I’ve also utilized **Google Meet** to conduct online classes. Additionally, I mentored students for a national IT quiz bee competition, using **Kahoot** as a practice tool to simulate the actual quiz environment. I also incorporated **Padlet** into one of my courses for interactive and video-based assessments, enhancing student engagement and participation.

These experiences reflect not only my **versatility in using a wide range of technology tools**, but also highlight my **initiative in finding and using the most suitable tools** to make teaching more effective and improve student learning.

Why PSHS?

With my **combined experience in education and technology**, I am prepared to support PSHS educators and stakeholders by providing responsive and practical IT solutions. I aim to contribute to smoother administrative operations and digital transformation efforts while supporting its mission of producing globally competitive Filipino scientists.

Attached to this letter are my **Personal Data Sheet (PDS), Work Experience Sheet, Transcript of Records, relevant certificates, and Individual Performance Commitment and Review (IPCR) forms for the past semesters**, excluding the most recent one. I have not yet received my Certificate of Eligibility from the local CSC office here in Marinduque, as it is still being processed and will be issued from the Quezon Province office. In the meantime, I am providing a copy of my **Notice of Rating** for your reference.

Thank you for your time and consideration. I look forward to hearing from you soon.

Regards,

Pollux M. Rey
