SUMMARY

Computer science educator with experience in banking systems, including service development and back-end IT support. Skilled in programming, office tools, and quick to learn new technologies. Detail-oriented and effective in fast-paced environments.

📁 EXPERIENCE

Lecturer

Marinduque State University

📅 August 2023 – May 2025

- Designed and delivered comprehensive syllabi for undergraduate courses in Computer Science, including **Discrete Mathematics, Cryptography, and Artificial Intelligence**.
- Researched and curated up-to-date content from leading textbooks and reputable online platforms to enhance course content and student understanding.
- Mentored graduating IT and IS students in preparation for the **DICT ICT Proficiency Examination**, contributing to their professional readiness.
- Developed **custom web apps and lab exercises** for courses in Artificial Intelligence and Cryptography, applying skills in programming, web development, and cybersecurity.
- Participated in the **redesign and modernization of the Marinduque State University website** to improve functionality, accessibility, and user experience.

Programmer

Asia United Bank

📅 April 2022 – March 2023

- Developed and maintained backend services for **Current and Savings Account (CASA) system** using Oracle Tuxedo (C language) and IBM Informix.
- Generated **comprehensive financial reports** to support various departments and branch operations.
- Performed **database troubleshooting** and applied fixes to resolve production issues and support ongoing maintenance.

📁 PROJECTS

DigitDetect

digitdetect.streamlit.app

An app developed for my Artificial Intelligence course, using a logistic regression model to recognize handwritten digits (0-9) from images.

Facial Recognition App

facial-recognition-app.streamlit.app

An app created to explore how facial recognition works, inspired by a system used at MarSU.

Sentiment Analysis of Customer Reviews in E-Commerce

github.com/polluxrey/Sentiment-Analysis-Ecommerce

A research study evaluating the effectiveness of Logistic Regression and Naïve Bayes in predicting sentiment, using scraped product reviews from an e-commerce platform.

🎓 EDUCATION

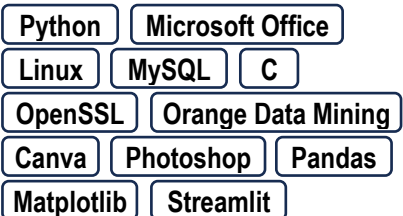

B.S. Computer Science

University of the Philippines
Diliman, 2022

Master in Information Technology

Marinduque State University,
In progress

💡 SKILLS

🏆 CERTIFICATIONS

Certificate of Proficiency in Computer Programming (C Language)

Department of Information and Communications Technology

Certificate of Proficiency in Basic Office Productivity Tools

Department of Information and Communications Technology

🏆 AWARDS

DICT National Digital Challenge Winner 2024

Outstanding Faculty

2nd semester, A.Y. 2023-2024
